

Product Requirements Document (PRD)

Product Name

Crescent Chique Designs 2.0

Product Vision

To provide an end-to-end digital platform for interior design firms to manage customer inquiries, design consultations, quotations, project execution, employee assignments, and client communication.

The platform should simplify interior renovation workflows while providing customers with transparency and a modern digital experience.

Problem Statement

Most small and medium interior design firms manage projects using:

- Excel sheets
- WhatsApp messages
- Phone calls
- Paper quotations

This creates problems such as:

- Lost customer information
- Poor project tracking
- Delayed quotations
- Lack of transparency
- Difficult employee management

The platform aims to centralize all operations into a single system.

Target Users

Primary Users

Customers

People looking for:

- Home renovation
- Modular kitchen installation
- Bedroom design
- Living room design
- Complete home interiors

Interior Design Firm Staff

- Designers
- Project Managers
- Sales Executives

Administrators

Business owners and management.

Business Goals

- Increase lead conversion rate
 - Reduce quotation generation time
 - Improve project tracking
 - Improve customer satisfaction
 - Create repeat business opportunities
-

Core Modules

Module 1: Authentication

Features:

- Customer Registration
- Customer Login
- Password Reset
- Admin Login

- Role-Based Access

Roles:

- Customer
 - Designer
 - Project Manager
 - Admin
-

Module 2: Design Gallery

Features:

- Browse design portfolios
- Search by room type
- Search by style
- Save favorite designs

Categories:

- Kitchen
- Bedroom
- Living Room
- Bathroom
- Dining Area

Styles:

- Modern
 - Luxury
 - Scandinavian
 - Industrial
 - Minimalist
-

Module 3: Consultation Booking

Features:

- Book appointment
- Select date and time
- Upload floor plan
- Add renovation requirements

Appointment Status:

- Pending
 - Confirmed
 - Completed
 - Cancelled
-

Module 4: Quotation Engine

Inputs:

- Area
- Room Type
- Design Package
- Material Grade

Outputs:

- Material Cost
- Labour Cost
- Design Cost
- Taxes
- Final Estimate

Generate downloadable PDF quotation.

Module 5: Project Management

Features:

- Create project
- Assign employees
- Track progress

Stages:

1. Lead Received
 2. Consultation
 3. Design Approval
 4. Material Procurement
 5. Execution
 6. Quality Check
 7. Handover
-

Module 6: Employee Management

Features:

- Add employee
- Assign projects
- Track workload
- View active projects

Employee Types:

- Designer

 - Site Supervisor
 - Electrician
 - Carpenter
 - Painter
-

Module 7: Customer Dashboard

Customer can:

- View quotations
 - Track project status
 - Upload documents
 - View invoices
 - Communicate with team
-

Module 8: Reviews & Feedback

Features:

- Ratings
- Reviews
- Satisfaction Survey

Scale:

1–5 Stars

Module 9: Analytics Dashboard

Metrics:

- Leads This Month
 - Active Projects
 - Revenue
 - Conversion Rate
 - Most Popular Design Style
-

Future Features

AI Design Recommender

Input:

- Budget
- House Type
- Family Size
- Color Preference

Output:

Recommended design styles.

AR Room Preview

Customer uploads room image.

System shows design preview.

Vendor Marketplace

Connect:

- Carpenters
 - Electricians
 - Furniture Vendors
-

Success Metrics

- 90% quotation generation within 5 minutes
 - 95% appointment tracking accuracy
 - 50% reduction in manual paperwork
 - Customer satisfaction > 4.5/5
-

MVP Scope

Version 1 should include:

- Authentication
- Design Gallery
- Consultation Booking
- Quotation Generator
- Project Tracking
- Admin Dashboard

Everything else can be added later.
