

Crescent Chique Designs 2.0

SUMMARY

The MVP aims to validate the core business workflow of an interior design company. The platform should enable customers to explore design options, request quotations, book consultations, allow admins to manage leads and projects, and allow customers to track project progress. Transform the existing CLI-based interior design project into a modern web application.

PROJECTS

Crescent Chique Designs 2.0 MVP | Version: 1.0; Status: Approved for Development

- Success Criteria: User can register and login; browse designs; request quotation; book appointment; admin can manage requests; project progress can be tracked.
- User Roles - Customer: Register, Login, Browse Designs, View Design Details, Request Quotation, Book Consultation, View Quotations, Track Projects; cannot access Admin Panel, manage designs, or manage employees.
- User Roles - Admin: Login, Manage Customers, Manage Designs, Manage Quotations, Manage Appointments, Manage Projects.
- Module 1 (Authentication): Register, Login, Logout, Password Hashing. Priority: Critical.
